

Every 15 seconds, a child dies from hunger

The treatment is simple. Getting it to children in time is the challenge.

In Gaza and other crisis-affected areas, children are struggling to access the food and care they need to survive.

Our approach helps over 90% of children recover from malnutrition in just weeks. But we need your help to be able to reach children in need.

Your donation can help the IRC and our partners keep lifesaving nutrition, medical care and clean water services running.

Malnutrition is treatable. But too many children still cannot access the care they need. The sooner treatment reaches a child, the better their chance of recovery.

Will you help a child with malnutrition get the care they need? Donate today to help reach children before it's too late.

The difference your support can make

“ After having the supplement, her health started improving. She would play and eat... she's a lot better now.

– Alaa, Gaza

**「All donations」
DOUBLED**

Your gift could go twice as far

£64 could pay for medical care malnourished children need during recovery. **For a limited time, your donation will be doubled.**
